Canadian Taxpayers Federation

Petition

No Carbon Taxes or Cap and Trade

To the Parliament of Canada:

The petition of the undersigned taxpayers of Canada states

- THAT carbon is not a pollutant but an essential element of all living things
- THAT the connection between man-made carbon emissions and global temperatures is minimal
- THAT carbon taxes and cap-and-trade systems would cripple Canada's economy

THEREFORE, we the undersigned, respectfully petition Parliament to refuse to enact any carbon taxes or forced compliance with cap-and-trade schemes.
