Notes:

1) Years of Service and age are calculated as of September 2000

2) Pension calculations are based on the following assumptions:

a) All MPs eligible to collect are defeated or retire in September 2000

b) Indexing for inflation purposes is calculated at 2.5% per annum.

c) The Basic Pension Amount (BPA) and yearly pension amounts are indexed from date of defeat instead of the Parliamentary method of retroactively applying inflation adjustments at age 60 back to time of defeat/retirement from the House of Commons
The answer derived for the 20 year max. calculation is mathematically identically using either method.the same.

d) MPs are assumed to collect their pension for a maximum of 20 years or from date of retirement/defeat until 75 years if MP is currently over 55 years of age.

e) In cases where MP is 75 or over, we assume pension collection until 80 years of age.

f) For MPs that are currently non-participating members of the MP Pension Plan (Status: Out), pension calculations show eligible amount if they opt in retroactive to 1993.

g) MPs who do not provide their age are assumed to be 55 as of September 2000.
