

# 2016 New Year's tax changes

by Jeff Bowes  
Research Director  
Canadian Taxpayers Federation

## About the Canadian Taxpayers Federation

The Canadian Taxpayers Federation (CTF) is a federally incorporated, not-for-profit citizen's group dedicated to lower taxes, less waste and accountable government. The CTF was founded in Saskatchewan in 1990 when the Association of Saskatchewan Taxpayers and the Resolution One Association of Alberta joined forces to create a national taxpayers organization. Today, the CTF has 89,000 supporters nation-wide.

The CTF maintains a federal office in Ottawa and regional offices in British Columbia, Alberta, Prairie (SK and MB), Ontario and Atlantic. Regional offices conduct research and advocacy activities specific to their provinces in addition to acting as regional organizers of Canada-wide initiatives.

CTF offices field hundreds of media interviews each month, hold press conferences and issue regular news releases, commentaries, online postings and publications to advocate on behalf of CTF supporters. CTF representatives speak at functions, make presentations to government, meet with politicians, and organize petition drives, events and campaigns to mobilize citizens to affect public policy change. Each week CTF offices send out Let's Talk Taxes commentaries to more than 800 media outlets and personalities across Canada.

Any Canadian taxpayer committed to the CTF's mission is welcome to [join at no cost](#) and receive issue and [Action Updates](#). [Financial supporters](#) can additionally receive the CTF's flagship publication [The Taxpayer](#) magazine published four times a year.

The CTF is independent of any institutional or partisan affiliations. All CTF staff, board and representatives are prohibited from holding a membership in any political party. In 2014-15 the [CTF raised \\$4.7-million on the strength of 30,663 donations](#). Donations to the CTF are not deductible as a charitable contribution.

## Summary

The package of tax changes introduced by the federal Liberal government mean big changes for most Canadian taxpayers, especially for those with children. Starting January 1<sup>st</sup> the tax rate on income between \$45,282 and \$90,563 drops from 22% to 20.5%, and the tax rate on income over \$200,000 rises from 29% to 33%. It also means the elimination of the Family Tax Cut, which allowed couples with children under 18 to notionally split their income resulting in a tax credit of up to \$2,000<sup>1</sup> or \$1,670 in Quebec.<sup>2</sup>

The federal Liberal government has also said that it will replace the Universal Child Care Benefit (UCCB) with the Canada Child Benefit (CCB) starting in July 2016. For the first half of the year, parents will still get their UCCB payments of \$160 a month for children under six and \$60 for children between six and 16. The CCB will be \$6,400 for child under six and \$5,400 per year per child 6 to 17 years old. That's \$533 per month for children under 6 and \$450 for children 6 to 17 years old. While the UCCB was taxed as income, the CCB will be tax-free however the benefit level paid out is reduced based on household income. Families with more than \$30,000 in household income will have the payment partially phased out. The phase out system is complicated with six phase out rates depending on family income level and the number of children. The introduction of the CCB will also mean the elimination of the Canada Child Tax Benefit and the National Child Benefit Supplement. Those are means tested benefits provided to families with children under 18.<sup>3</sup>

- The TFSA annual limit will be reduced from \$10,000 to \$5,500 for 2016.
- More and more provinces have some form of bracket creep. Manitoba, PEI and Nova Scotia didn't index any of their tax brackets. Ontario, and New Brunswick have stopped indexing their top tax brackets. Alberta isn't indexing its new tax brackets for 2016, but it will begin indexing them in 2017.
- There are slight increases in EI and CPP taxes because of the difference between inflation and wage growth.

---

<sup>1</sup> <http://www.fin.gc.ca/n15/15-086-eng.asp>

<sup>2</sup> This is caused by the federal tax abatement in Quebec, which effectively lowers the federal tax rate in Quebec, but decreases the federal transfers to Quebec.

## EI and CPP

The slight increases in both EI and CPP from 2015 to 2016 is caused by differences in how inflation is accounted for. For EI and CPP the maximum insurable earnings and maximum pensionable earnings are indexed to increase for change in average weekly earnings. The calculations in this report compare taxes from different years using constant 2016 dollars. To do this the Consumer Price Index is used and it did not increase as quickly as wages. For CPP the basic tax exemption isn't indexed to inflation at all.

Employee Maximum Annual EI and CPP Taxes in 2016 Dollars							
Year	EI	Change	CPP	Change	EI and CPP Combined	Combined Change	Combined Change
2006	\$860.72	-5.7%	\$2,255	1.0%	\$3,116	-\$30.16	-1.0%

2015	\$3,465	47.4%	\$3,843	52.6%	\$7,307
2016	\$3,499	47.4%	\$3,881	52.6%	\$7,381

## Example Tax Cases

Canadians are taxed at different rates depending on their income, what province they live in and other factors. To get a glimpse into these differences and how taxes change depending on your situation, we have calculated the change in taxes for 34 sample households in each province.

These households include single people, couples with two children and couples with no children. The children are assumed to be one under 6 years old and another between 6 and 17. They also cover a wide range of incomes from \$15,000 to \$300,000. They include different splits in spousal incomes with single income households, household where the spouses make an equal income and families where one family member makes 75% of the household income. The tax changes are most significant for families with children. The Family Tax Cut, commonly known as income splitting, is gone for 2016. Also the Universal Child Care Benefit will be eliminated half way through the year and replaced with the Canada Child Benefit.

The calculations include the average tax which is the per cent of income taken as income and payroll taxes. This is different than the marginal tax rate used in Canadian tax brackets. The marginal rate is how much each additional dollar will be taxed, the average rate is how much of your entire income is taxed.

The Canadian tax rates are the population weighted average for all provinces and territories.

## Accounting for Inflation

This report accounts for inflation in all its calculations. Most provinces index their tax brackets. This means that if your salary increases with inflation you won't be bumped into another tax bracket. Provinces that don't do this have sneaky tax increases known as "bracket creep." Provinces that index to the national rate of inflation may also have bracket creep depending on the difference between the federal and provincial inflation rates.

Indexing is done using the change in prices from September 2014 to September 2015. All calculations for 2016 use an inflated salary indexed at the inflation factor for the province. For example, for the Ontario \$60,000 case, a salary of \$61,200 salary was used for 2016. This method helps show the impact of bracket creep. Also, by comparing the inflation adjusted 2015 taxes to 2016 taxes, the real increases in taxation can be seen and the effects of inflation eliminated.

	Indexation
British Columbia	Fully indexed
Alberta	Not indexed this year
Saskatchewan	Index to national inflation
Manitoba	Not indexed
Ontario	Top two tax brackets not index
Quebec	Fully indexed
New Brunswick	Top two tax brackets not index, others indexed to national inflation
PEI	Not indexed
Nova Scotia	Not indexed
Newfoundland	Fully indexed
Federal	Fully indexed

PEI had deflation last year. If its tax brackets had been indexed to the negative inflation, taxes would have actually gone up. That's not a normal occurrence, but this year PEI wouldn't have benefited from indexation. New Brunswick also has negative bracket creep. That's because the calculations for this report assume that incomes are changing based on the provincial inflation rate. In 2016 some New Brunswick taxpayers will benefit from the province's practice of indexing to national inflation. However, New Brunswick doesn't index its top two brackets at all, so taxpayers that fall into those tax brackets will experience bracket creep.

More and more provinces have some form of bracket creep. Manitoba, PEI and Nova Scotia don't index any their tax brackets at all. That wasn't a problem in PEI this year but it will be in the future. Ontario, and New Brunswick are not indexing their top tax brackets. Alberta isn't indexing its new tax brackets for 2016, but it will begin indexing them in 2017.

Inflation September 2014 to September 2015	
National	1.3%
British Columbia	0.9%
Alberta	1.3%
Saskatchewan	1.7%
Manitoba	1.1%
Ontario	1.5%
Quebec	1.1%
New Brunswick	0.6%
PEI	-0.5%
Nova Scotia	0.6%
Newfoundland	0.4%

The rates in this chart is the average tax rate which is the per cent of income taken as income and payroll taxes. For these calculations child benefits, including UCCB, CCB and CCTB, have been treated as negative taxes. So if you paid \$1,000 in taxes but the government sent you \$1,000 in UCCB and CCB payments your average tax rate would be 0%.
