

Stop Trudeau's Second Carbon Tax

The federal government is introducing new fuel standard regulations to require industry to reduce the carbon content of fossil fuels. If industry can't meet the standard, they'll have to pay a \$350/tonne carbon tax. This tax will ultimately hit already struggling families and businesses.

It's bad enough that taxpayers are already paying for one carbon tax. Canadians certainly can't afford a second carbon tax.

We, the undersigned, call on Prime Minister Justin Trudeau to scrap plans for a second carbon tax.
