
Stop the Employment Insurance Rip-Off

To the Prime Minister and the Parliament of Canada:

EI taxes cost a working couple and their employer over \$4,200 every single year, yet most of us don't ever see a dime of this money. Meanwhile, many people abuse the system and collect EI every year.

Canadians should be able to keep their EI taxes in an Employment Insurance Savings Account to be used when they or a family member loses their job. And if they have money left over when they retire, they should get to keep it for their retirement.

We the undersigned call on Prime Minister Justin Trudeau to allow Canadians to keep their EI taxes and end this massive government tax grab.
