

## Stop roadblocking pipelines

## To Prime Minister Justin Trudeau:

Governments are making it harder to grow our economy and create good paying jobs by roadblocking Canadian projects like pipelines.

Fewer pipelines and resource projects mean politicians are putting heavier burdens on taxpayers to cover the lost revenues.

We should be supporting Canadian resource development and taxpayers, not passing laws that harm our workers and make it easier for foreign countries to out-compete us.

We the undersigned call on the government of Canada to allow job creators to build Canadian energy projects.
