

**To Members of the New Brunswick Legislature:**

Even though over the past few years the New Brunswick government has raised the HST, income taxes, gas taxes, business taxes and just about every government fee, New Brunswick Premier Brian Gallant says he supports putting a carbon tax on all taxpayers.

A carbon tax is just one more hit to taxpayers already struggling to make ends meet. It will raise the costs of everything from food to clothing and mean lost investment in the province.

**We the undersigned call on the New Brunswick government to stand up to the federal government and say no to imposing a new carbon tax on New Brunswickers.**
