

To all Members of the National Assembly,

Quebec's debt has doubled since 2004 and there are few signs of it actually stopping. The government claims having balanced its budget this year, but the debt continues to grow. It's time to ask the government for a sustainable debt reduction plan. Without it, today's debt will become tomorrow's tax hikes.

We the undersigned call on the National Assembly to cut waste, eliminate frivolous programs and balance Quebec's budget.
