

ATIP analyst's clarification on Federal Public Service Numbers 2025

Could you please provide the total number of FPS executives and the total number of FPS non-executives in 2025?

18,041 employees held an Executive position at some point during the year

414,525 employees only held a non-Executive position

Total of 432,566 active employees during the 2025 calendar year.

As for totals, it looks like that's the number of employees that received a bonus, rather than the total number of people the FPS employs?

The numbers previously provided were the number of employees who received each type of bonus or other form of performance incentives.

To clarify, there were 432,566 active employees during the 2025 calendar year.

Can it be inferred that every employee received a bonus? If so, we will use the numbers on the chart to indicate the total number of employees in the FPS. If not, please send the total number of employees?

No, not all 432,566 public service employees in 2025 received a bonus or other form of performance incentives.

142,269 of 414,525 non-Executive employees received a bonus or other form of performance incentives.

15,898 of 18,041 Executive employees received a bonus or other form of performance incentives.
