

Survey Report

Federal bureaucracy  
Omnibus Question

Date: April 16, 2025  
Project: 83248-036

### Methodology

How

An online survey.

Who

n=1,630 Canadians, 18+.

When

Completed between April 11th and April 13th, 2025, using Leger's online panel.

Other

No margin of error can be associated with a non-probability sample (i.e. a web panel in this case). For comparative purposes, though, a probability sample of n=1,630 respondents would have a margin of error of +2.4%, 19 times out of 20.

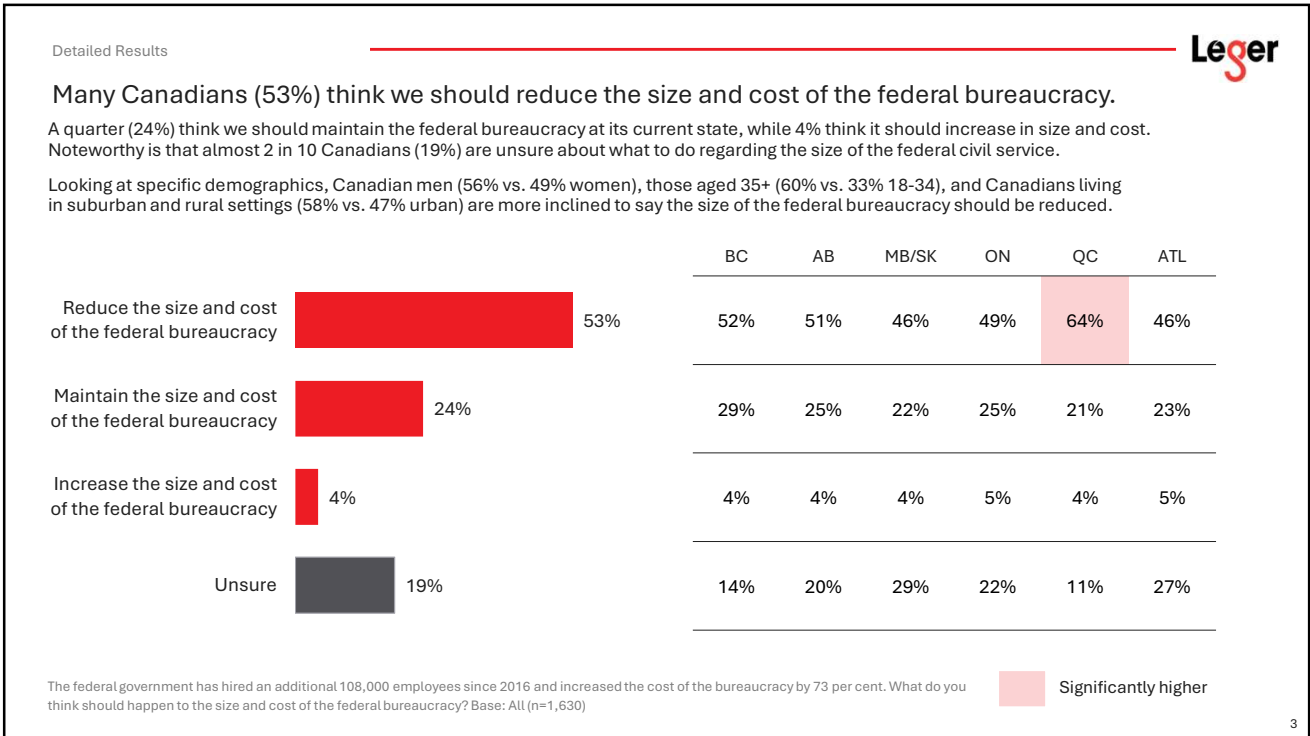

#### Leger's online panel

Leger's online panel has more than 400,000 members nationally and has a retention rate of 90%.

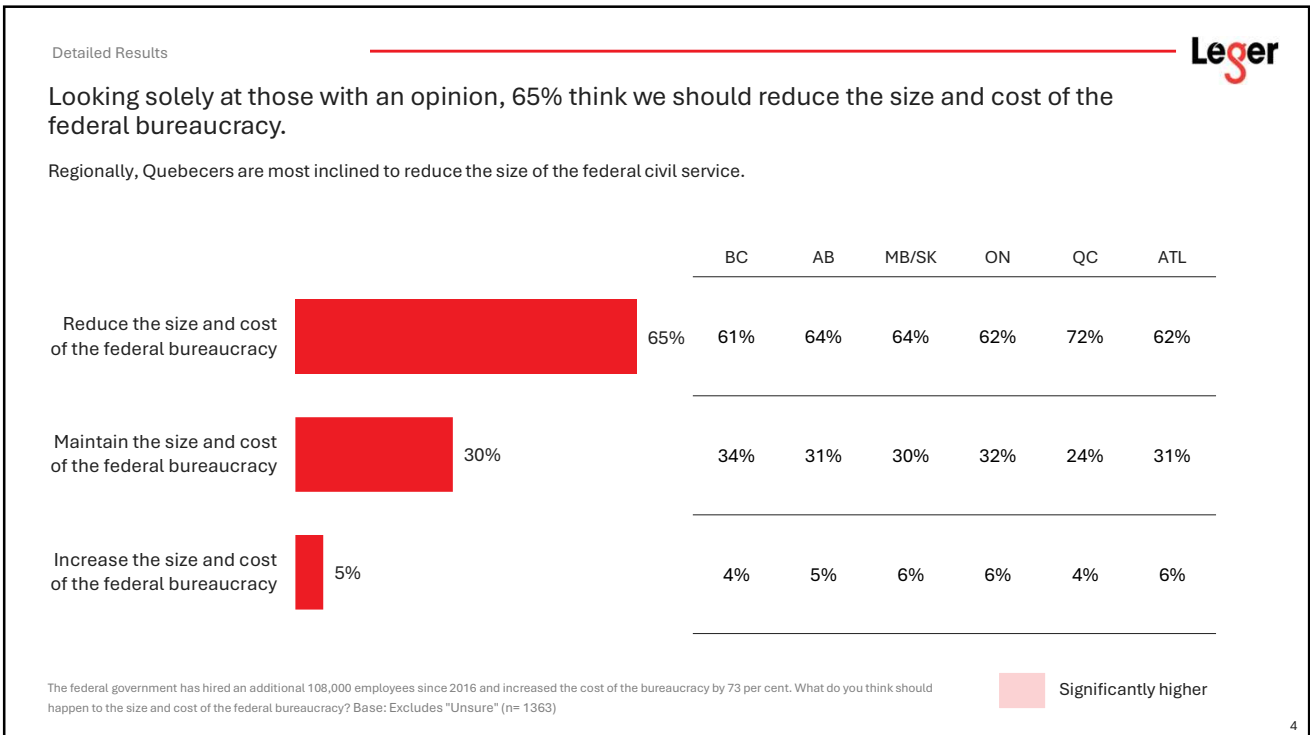

#### Quality control

Stringent quality assurance measures allow Leger to achieve the high-quality standards set by the company. As a result, its methods of data collection and storage outperform the norms set by WAPOR (The World Association for Public Opinion Research). These measures are applied at every stage of the project: from data collection to processing, through to analysis. We aim to answer our clients' needs with honesty, total confidentiality, and integrity.

Leger is the largest Canadian-owned market research and analytics company, with more than 600 employees in eight Canadian and US offices. Leger has been working with prestigious clients since 1986.
