

Survey Report

Federal Spending
National Omnibus

Date: June 4, 2025 Project: 83248-038

Methodology

How

An online survey.

Who

n=1,519 Canadians, 18+.

When

Completed between May 30th and June 1st, 2025, using Leger's online panel.

Other

No margin of error can be associated with a non-probability sample (i.e. a web panel in this case). For comparative purposes, though, a probability sample of n=1,630 respondents would have a margin of error of $\pm 2.5\%$, 19 times out of 20.

Leger's online panel

Leger's online panel has more than 400,000 members nationally and has a retention rate of 90%.

Quality control

Stringent quality assurance measures allow Leger to achieve the high-quality standards set by the company. As a result, its methods of data collection and storage outperform the norms set by WAPOR (The World Association for Public Opinion Research). These measures are applied at every stage of the project: from data collection to processing, through to analysis. We aim to answer our clients' needs with honesty, total confidentiality, and integrity.

Leger is the largest Canadian-owned market research and analytics company, with more than 600 employees in eight Canadian and US offices. Leger has been working with prestigious clients since 1986.

Leger

Over two-fifths (45%) of Canadians believe the federal government should reduce its spending over the next four years, while one-in-five think it should either remain at current levels or increase.

Canadians aged 35 and older are more likely to say the federal government should somewhat reduce spending (28% vs. 17% among those under 35). In contrast, men and younger adults (aged 18-34) are more likely than their counterparts to believe the government should increase spending.

ВС	AB	MB/ SK	ON	QC	ATL	Male	Female	18-34	35-54	55+

Significantly higher

Q1. Federal government spending increased by 26 per cent over the last five years, after adjusting for inflation. What do you believe should happen to government spending in the next four years?

Among those with an opinion, a majority of Canadians (54%) believe the federal government should reduce its spending over the next four years.

Women and Canadians aged 35+ are more likely to say the federal government should somewhat reduce spending.
